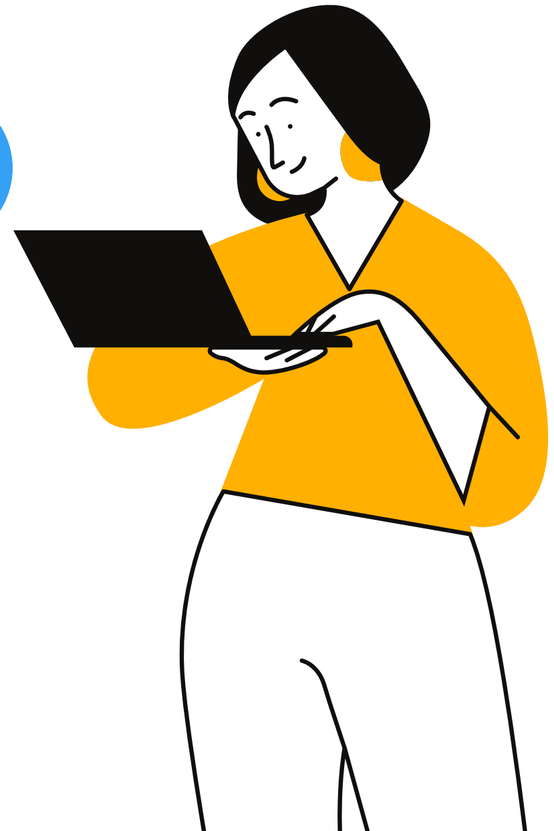
Which language to choose for DSA?

C / C++ / JAVA / Python /JavaScript ???



C++	JAVA	PYTHON	JavaScript
STL having in-built Containers, Iterators and Algorithms.	for development java is used most in the industries	easy to understand langugae	is both server-client side application language
one of the best programming language for competitive programming	Works a bit slow than c++	Since its a interpreted language execution is slow	javascript takes care of memory allocation
c++ is a faster language among these two	automatic memory management by garbage collector	Can be used in development as well	less resources available
